Copy User Permissions
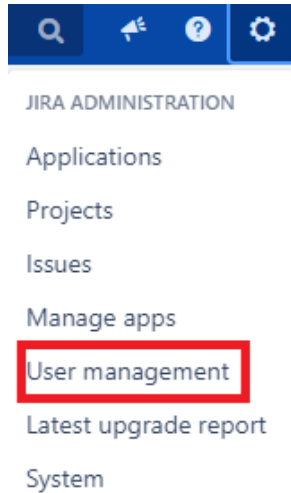

With this premium feature you will be able to assure that a user (user B) has the same permissions that another one (user A).

Where can I find it?

You would be able to find this functionality at user management. To access it you should click under the cog icon [gear icon] and then choose user management option:

JIRA ADMINISTRATION

Applications

Projects

Issues

Manage apps

User management

User Directories

EXCENTIA ADMIN TOOLS

Copy User Permissions
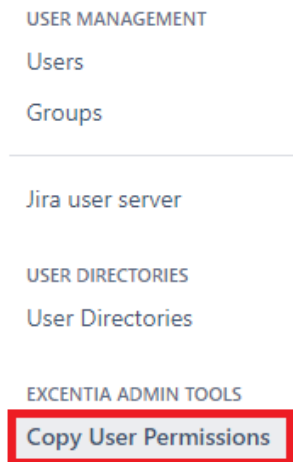

How does it work?

You should select two user, user A and user B. By default, the plugin will include user B into:

- Groups user A belogns.
- Project roles in wich user A is one of its members
- Any section of every permission scheme where user A appears as individual user.
- Any issue level where user A appears as individual user in every issue security scheme.

Furthermore you will be able to choose any of the next options:

- Add user B to all notifications scheme where user A appears as individual user.
- Set user B as project leader in those projects where current leader is user A.
- Set user B as component leader in those project components where current leader is user A.
- Assign all issues which are currently assigned to user A to user B

Copy User Permissions

Copy User Permissions

ⓘ When copying user permissions, user will be included to those permissions and issue security schemes in which the original user appears, additionally user will be added to those groups and proyect roles in which the original user is member.

Copy permissions from user: jevans-sd-demo ▼   Into user: agrant-sd-demo ▼

Additional options:
- ☑ Should user be added to notification schemes?
- ☑ Should project leadership be replaced?
- ☐ Should component leadership be replaced?
- ☑ Should issues be reassigned?

Accept
