

Business Reports

Jira Service Desk has many reports that allow us to exploit all the information that we deal with within the system, such as the typical Created vs Solved Issues Report, or Pie chart report. However, there are times when it is not enough, and that is why we add two reports that can be very useful.

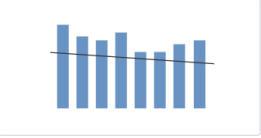

Jira Service Desk

Dashboards ▾ Projects ▾ Issues ▾ Create

All reports

Issue analysis

Average Age Report
Shows the average age of unresolved issues for a project or filter. This helps you see whether your backlog is being kept up to date.

Created vs. Resolved Issues Report
Maps created issues versus resolved issues over a period of time. This can help you understand whether your overall backlog is growing or shrinking.

Customer satisfaction (excentia Admin Tools)
Customer satisfaction report for Jira Service Desk projects

Pie Chart Report
Shows a pie chart of issues for a project/filter grouped by a specified field. This helps you see the breakdown of a set of issues, at a glance.

Recently Created Issues Report
Shows the number of issues created over a period of time for a project/filter, and how

Resolution Time Report
Shows the length of time taken to resolve a set of issues for a project/filter. This helps

Service Level Agreement (SLA) Report (excentia Admin Tools)
SLA report for Jira Service Desk projects

Single Level Group By Report
Shows issues grouped by a particular field for a filter. This helps you group search

End date: 21/01/2020

SLA Report

Stats

SLA	Breached	Unbreached
Problema	17	0
Tempsos febles resolució	32	0
Tempsos febles primera resposta	31	1

Problema
Tempsos febles resolució
Tempsos febles primera resposta

You can set a start and end date to filter your SLA data, also you can filter out the breached issues.

Here you will see, all the SLAs configured, the number of issues breached or not, and a pie chart with the percentage of unbreached SLAs.
