

Issues By Author Samples

Since version 1.8 in Confluence Server and version 1.2 in Confluence Cloud, the SonarQube Issues by Authors Macro is available where you can view the SonarQube issues of one or more authors.

At the top is a summary with the totals of the issues by type and by severity.

The bottom part shows a breakdown of the different issues in tables grouped by severity.

Project: I18n Bundle Comparator master

Critical Issues				
	Cognitive Complexity of methods should not be too high	Java		1

Major Issues				
	"Preconditions" and logging arguments should not require evaluation	Java		9
	Assertion arguments should be passed in the correct order	Java		5

Minor Issues				
	Local variables should not be declared and then immediately	Java		2
