

Features

With SonarQube Connector for Confluence you will be able to integrate your Confluence' spaces and pages with your SonarQube instance and code quality metrics.

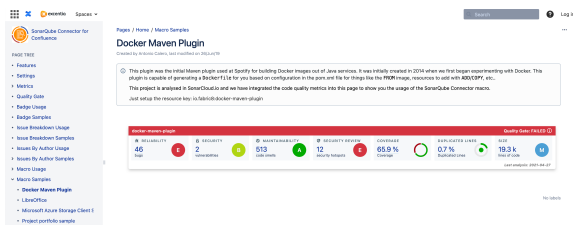

The integration allows all the members of your team to review code quality data without leaving Confluence's interface. Therefore, even the members that do not usually visit SonarQube instance will be informed of the quality of the projects.

The app has been developed with agile methodologies in mind, and therefore it seeks to contribute not only to your productivity but also to your implementation of agile practices. Make it simple.

The Confluence app includes macros and badges to help you to integrate content from SonarQube

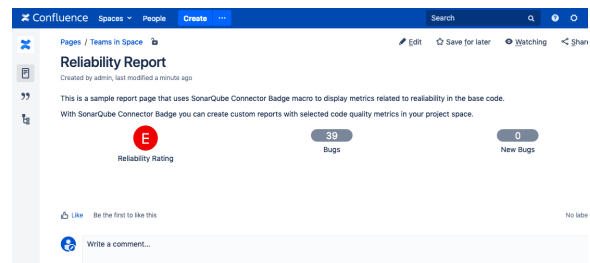

SonarQube Connector Macro for Confluence

You can add to your Confluence page your project code quality at anytime by **using the SonarQube Connector Macro**. Setup your server and project key and access the full SonarQube dashboard with all your summary and details in your page:

SonarQube Connector Badge for Confluence

We have created a new macro to retrieve badges from SonarQube related to any existing metric. Just add your macro, setup your SonarQube Server and your project key, and set the metric key to retrieve. The badge will be rendered in your Confluence page and you will be able to see the value of the related metric:
