

# OpenAI Configuration

## Configure OpenAi Token

It will only be necessary to add an open ai token to the configuration of our connector at the project level or in the global configuration of our connector.

☰ OpenAI Settings EXPERIMENTAL

Override Global OpenAI Config ☒ Check this option if you want to override global OpenAI configuration.

OpenAI Token

Configuring this field will automatically add comments to Jira issues created by the application (3 comments max). These comments are suggestions for resolve the problem in code using the [OpenAI API](#). If you don't have a token, you can generate it from [here](#)

## OpenAI Doc

To consult all the documentation associated with open ai requirements and security, it can be consulted [here](#).
