Cards Plugin for Jira

The fastest and easiest way to automatically kanbanize your Jira projects

Drag and drop support, filtering and much more!

Welcome to Cards for Jira documentation space!

The definitive Kanban app for Jira keeps improving for you! Since its release in 2015, Cards has been improving and even caught Atlassian team interest! It's design and usability made the app look like a native Jira feature.

What is more, no configuration or board creation are needed. Install the plugin and Knaban boards will be automatically created for each project.

Please, feel free to navigate through the space and do not hesitate in contacting us!
